## Summary

Versatile full-stack engineer with 15+ years of real-world systems experience. Pivoted to software in 2025 to build premium streaming platforms, mobile apps, and secure real-time infrastructure. Known for building production-grade projects with clean architecture, advanced UI/UX, and end-to-end DevOps handling.

## Technical Skills

- Frontend: React, Next.js, Flutter, TailwindCSS
- Backend: Node.js, Express.js, PostgreSQL, MongoDB, Redis
- Real-Time: WebRTC, Socket.IO, FFmpeg, TURN/STUN, Media Servers
- DevOps: Docker, NGINX, Adminer, GitHub Actions
- Security: JWT, bcrypt, CSRF, rate limiting, logging
- Tools: Git, Figma, Postman, VS Code, Admin Dashboards

## Projects

- Gjyl: Social video app with Discord-style voice/video, token economy, Flutter UI, age-gated control, and in-app marketplace.
- Streaming Cam Site: Adult streaming site with model dashboards, tipping, gifting, real-time admin tools, and full Docker stack.
- Legal Monitor: Admin-only surveillance system with encrypted logs, IP heatmaps, DMCA alerting, and evidence export.
- Full UI Systems: Built mobile-first, real-time web UIs with modern component libraries, animations, and streaming visuals.

## Experience

2025 - Present: Full-stack developer, building platforms like Gjyl and adult cam site from scratch.

# Paul Stenet (aka PaulyBearCoding)

2008 - 2024: Lead infrastructure/maintenance tech - Managed physical systems before pivoting into software with same hands-on rigor.

## Education & Learning

- Self-taught developer with professional infrastructure background
- Certified in operations safety, digital platforms, and system architecture
- Continuously learning UI frameworks, backend scaling, and DevOps
